

Modernization Services for SAP Environments From Hitachi Vantara

SOLUTION BRIEF

Lead Your Organization to the Forefront of Innovation

Staying current with the latest SAP technology is key to reaching your vision and business goals, but it's understandable why many organizations fall behind. Migrating to advanced technology capabilities and new operating models is a major undertaking when there are multiple ERP systems and numerous data sources growing more and more out of control.

Take the leap from outdated technology to the latest innovations and transform your business with Modernization Services for SAP Environments from Hitachi Vantara. We help you manage the complexity of modernizing your SAP technology so you can finally harness the power of your data, build a solid business case for change, and guide your organization to embrace a better way to operate.

Maximize the Value of Your SAP Technologies and Investments

Modernization Services for SAP Environments from Hitachi Vantara is part of Hitachi's complete SAP portfolio of solutions and services. With over 20 years of experience as a global SAP customer, partner, and advisor, we help add value to your SAP technologies and investments by optimizing the digital core. We unleash the power of the cloud and extend the digital core with machine learning, analytics, and robotic automation – for smart, connected operations. We understand your business challenges and can help simplify your approach to deliver the outcomes you need.

Benefits of Modernizing Your SAP Environment

- Identify your most pressing challenges and explore new opportunities with guided discovery sessions. We ask all the right questions that lead to the best design and implementation.
- Accelerate and maximize the value of your new SAP technology. Do more than just a technical software upgrade; change, reconfigure, and enhance your technology to enable new capabilities.
- Remove the complexity and risk of migrating to the latest SAP technologies, while reducing the cost and time required for a smooth and streamlined migration.
- Access a world-class team of SAP solution architects, developers, and project managers who have the industry experience needed to successfully migrate to a new operating model.
- Educate your users on new SAP technology to make better decisions and reach new heights in customer satisfaction, inventory optimization, and supply chain management.

A Proven Approach to Transforming Your Organization

Modernization Services for SAP Environments from Hitachi Vantara includes the following:

- Advisory services and assessments help you analyze your current state and establish your future vision. We equip you with a business case that shows the financial and operational impact of addressing inefficiencies, driving cost reductions, or creating new lines of business.
- A global model design and migration plan, based on requirements gathered from various workshops, provides a clear road map to a new operating model, all mapped to SAP capabilities.
- Migration plan implementation is based on SAP best practices, starting with an audit and governance of all your data assets and sources.
- A solid change management methodology ensures that your organization can embrace change and drive adoption of new processes and tools. The importance of change management is often underestimated as it is a critical part of successful business transforming.
- Once migration is completed, we provide a streamlined transition to full Managed Services, or Application Maintenance Services (AMS) for helpdesk support and Run Services for bug fixes, patch updates, backup, and recovery.
