

SOLUTION PROFILE

SAP Modernization on AWS from Hitachi Vantara

Accelerate your migration to AWS

Organizations are transitioning their mission-critical SAP applications and SAP workloads on Amazon Web Services (AWS) to be more agile, efficient, and responsive to market needs. However, these initiatives can become a herculean task. The lack of meticulous planning, failure to conduct perceptive analysis, and agile execution can result in disruptive day-to-day operations and considerable impact on people and processes. To ensure SAP on AWS transformation is seamless and effective, you need an expert that can get a quick and clear understanding of clients' systems, has expertise in the AWS system architecture, and has capabilities to upgrade, patch, or redesign applications and their systems all at once.

Hitachi Vantara and AWS makes the complex SAP transformation cost-effective and effortless with a robust migration plan that fits your business requirements and drive future adoption of innovative SAP solutions. Whether you plan to transition completely to SAP on AWS or take a hybrid approach and leverage existing or new on-premises infrastructure for some applications while moving other applications to AWS, we can help build and implement your cloud strategy depending on your business needs.

Experience all the benefits of SAP on AWS services with Hitachi Vantara

- Simplify complex SAP migrations with the breadth of Hitachi Vantara and AWS tools and services that modernize SAP workloads.
- Take advantage of Hitachi Vantara's cross-industry experience and our best practices for transforming data into business value so your employees can harness the power of SAP solutions on AWS.
- Faster implementation of SAP solutions with exclusive Hitachi Vantara accelerators for SAP Internet of Things (IoT), SAP Business Technology Platform (BTP), SAP Analytics Cloud (SAC), and Hitachi Edge in a Box.

A holistic approach to modernizing your infrastructure

Migrating and modernizing SAP landscapes on AWS with Hitachi Vantara includes the following:

- Assessment services to inventory all existing applications, not just SAP applications, that are ready for cloud and recommend the optimum cloud platform for your SAP workloads.
- A global design and migration and/or upgrade plan, based on requirements gathered from in-depth planning workshops, to architect your road map that is aligned to your business priorities and timelines.
- SAP S4/HANA services based on SAP best practices, including an in-depth audit and governance of all your data assets and applications.
- A thoughtful change management methodology to ensure that your organization can embrace your journey to cloud and drive adoption of new processes.
- Streamlined transition to Application Maintenance Services (AMS) for helpdesk support, training, and enhancements.

Capitalize on your SAP Technologies and Investments

SAP Modernization on AWS from Hitachi Vantara is part of Hitachi's complete SAP portfolio of solutions and services. With over 20 years of experience as a global SAP customer, partner, and advisor, we add value to your SAP investments by enabling you to use SAP products and technology platform, adapt and implement innovation across the entire value chain rapidly and transform your enterprise's business. Together, Hitachi Vantara and AWS offer their customers a practical and cost-effective process for migration to SAP S/4HANA and reduce the complexity of maintenance with RISE for SAP on AWS. We understand your business challenges and can help simplify your approach to deliver the outcomes you need.
